Equipment

EDGING MACHINE

The specialised edging machine that combines simplicity with precision. Self propelled by way of the concrete forming process, which means perfect concrete edges every time. The unique, solid construction, gives long-term worry free operation.

- Petrol engine – 4 stroke convenience
- Turning radius of 0.8 of a metre
- Bigger tyres for easier handling on soft or sandy work sites
- Fitted with heavy duty bearings
- Low centre of gravity ensures greater stability on sloped sites
- Split level design allows you to extrude concrete on ground level or in a trench 20mm wider than the mould
- Supplied with popular moulds and hand trowels to suit
- One piece bolt on moulds
- Larger moulding and compaction chamber
- String line pointer
- Fitted with pneumatic tyres and steel hubs
- Slide steering rail lock bolt
- Height adjustable steering handle
- Telescopic height control for undulating surfaces
- All round access for motor maintenance
- Bigger feeding hopper for concrete
- Tough powder coat paint finish

Benefits

Petrol engines meaning - No extension leads or tripping hazard

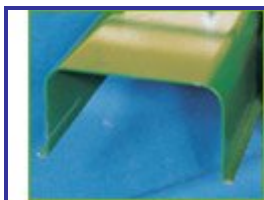

No safety tags

Environmentally friendly – low impact on surrounding areas

The edger goes tight around small objects

Fast interchangeable moulds

Custom made moulds available

Sloping Border

Equipment

TRENCH DIGGER

The all terrain trenching machine. Driven off the rear wheels and with the cutting blade wider than the wheel tracks (cut hard up against walls, paths, driveways etc), this machine makes digging a trench a pleasure. Capable of cutting 100m in 15 minutes, the unique handlebar system provides stability and maneuverability over any terrain.

- Height adjustable handles
- Telescopic cutting blade depth control
- Heavy duty bearings
- Power source – petrol engines
- High tensile cutting blades
- Bigger tyres for maximum traction with Rear wheel drive for superior traction
- Double crank drive to cutting blade

Benefits

Petrol engine means: - No extension leads = no tripping hazard = No safety tags

Maximum power

More stability

Maximum traction

BORDERLINE NZ TRAILER

Having had countless years hands on experience Borderline Australia have engineered a special purpose trailer which Borderline NZ have taken and enhanced for the New Zealand environment.

- Security locker, fully weatherproof for all machinery and tools
- Tarpaulin to cover your load
- Quick connect cement mixer for all round convenience – petrol engine
- Large capacity sand bay
- 2 tonne gross capacity trailer
- Standard mechanical disc brakes
- Fully sign written and personalised with your phone number
- Heavy duty 14" light truck tyres with chrome hub caps and spare tyre
- Swivel head tow bar attachment
- Dual axles for safer towing stability

Benefits

No delivery costs for materials – load up your own trailer and take it to the job

No wastage, you can take the left over sand with you for the next days work
